General (Education)

Subject Letter No $\frac{9610}{389}$ of $\frac{27}{20}$ Apr 1904 from the L of of Bd in Mysore Submitting for sanction a Revised Scale of Establishment for the Industrial School at Mysore.

With the above letter the L of has submitted a Statement showing the Scale of Establishment ^{as under} in the Budget for the current year the Scale as it now stands and the Scale proposed from 1st July 1904

The additional cost involved by the proposed revision is summed up as follows —

late Suppl was ordered to presented and his pay of 150 was distributed as follows	1) Appointment of a Sup ^x on Rs 200 - 25 - 250	R. 200
Secretary - (allowance) - 50	2) Promotion to the Technical Instructor - hereafter to be styled - Head Instructor	5
Technical Instructor 70	for Rs 10 to Rs 75 —	
Pottery Master — 30	Promotion to the Mechanic from Rs 25 to 45	10
<u>150</u>	Drawing master from Rs 30 to 40	10
The above arrangements are only temporary (vide file put up) - E		

Promotion to the Pottery	}	15
Master from Rs 30 to 45		
Appointment of a Weaver	}	35
Master		

Total increase — 275-

Decreases proposed

1) Abolition of the post of Secretary who is now paid an allowance of Rs 50	}	50.

2) do of the masonry Master on Rs 30	}	30

3) do - of a pottery Master on Rs 15	}	25

Total decrease = 105-

Net increase — Rs per house

A promotion from Rs 30 to 35 for the Carpentry Master of the school and the appointment of a Smithy master on Rs 35 in the place of 2 masters on Rs 20 and 10 were sanctioned

by O No 583 4 dt 3/8/03. and the additional cost involved viz Rs 10

met during the current year from Decrees. This amount has

therefore to be included in the next ³ year's Budget.

Thus the total additional cost to be included in the Budget is Rs 180 per annum of which Rs 10 has already been sanctioned and Rs 170 is now proposed to be sanctioned

Out of this 180 Rs, a sum of Rs 120 is proposed to be met from Savings under Scholarships in the weavers' class and in the Artware Manufactory which have been discontinued by the Lgt and the balance viz Rs 60 per annum or 720 per annum will have to be provided in the Budget

All the promotions proposed except that of the Technical Instructor from Rs 70 to Rs 75 have been recommended by the Committee. The reasons for the pay fixed for the post of the Supt are given in this as well as in another letter of the

the

17/5/04

These are well considered
proposals & I am in
favor of them being
allowed - The net-
costing Rs 720 a
year and I would not
grudge this in the case
of so important an
educational school
as the more especially
as the difference between
the way of the present
& the proposed system
can rightly be regarded
as the cost of inspection
of other similar schools
in the State - Q

19/5/04
Returned for being circulated
to Council as per orders of

17 5 04
Argentine for disposal
by circulation
P - Q

I am of humble opinion that the
 Establishment already sanctioned (Costing
 434^{Rs} ^{per month} & shown in col 2 of the statement
 of 9) is more than ample, as it provides
 for a Textural instructor on 70 Rs
 a mechanic ——— on 35 Rs
 a Drawing master — on 30 Rs
 a Masonry master — on 30 Rs
 an Iron smith ——— on 35 Rs
 a Carve work master — on 20 Rs
 a Carpenter ~~on~~ — on 35 Rs
 a Pottery master — on 30 Rs
 so ——— on 25 Rs I would have a
keeper for this
 a Clerk ——— on 20 Rs
 a Store keeper ——— on 15 Rs
 7 peons ——— for 39 Rs
 & a Sayer or Equal-Supt. — on 50 Rs
734

These are very liberal rates & there seems
 to be no urgent necessity to raise them or
 proposed — Nor is there need to appoint a
 Supt on 200 Rs rising to 250 Rs in lieu of the
 present Sayer or Supt on 50 Rs. While in Mysore I
 did not see much being done in this institution.
 An allowance 50 Rs (intended for the Sayer) to a capable

off of any of the numerous debts in ~~1890~~ -
will be enough to induce him to Superintendent
the school. There is absolutely no work
there (for the present at all events) for
an off on 250th -

PKS
8/6/1904

Question: How is the ^{been} ~~been~~
accounted for the appearance
ment of a Supd - a \$200-250
including which amount
the net extra cost of ^{to} ~~to~~
is \$2000 per annum & away
in favor of maintaining
the school proposed con-
sidering the importance
and usefulness of the
institution -

16 July

My dear Sir

In connection with
your letter No 9610-389 of
27th April 1904, submitting
for Sanction a revised
Scale of establishment
for the Industrial School
at Mysore, the Dewan
desires to have a short
account of the progress
of the School and the results
it has turned out during

OFFICE OF
THE INSPECTOR GENERAL OF EDUCATION
IN MYSOR

D^d 25 July 1902

Dear Mr. Shamakers,

With reference to
your note of the 18th Instant
asking for an account of
the progress results & expenditure
principles of the Mysore
Industrial School, I enclose
a memorandum giving
the information required

Yours truly
H. P. N. S. N. S.

The Mysore Industrial School

The school was started in February 1892
The number on the rolls has varied from 64 to
188 During the first two years the subjects
taught in the school were (1) Carpentry
(2) Masonry (3) Blacksmiths work, and
(4) Rattan work (5) Drawing & (6) Modelling,
the last two being taught to all As the school
grew new industries were introduced and
the course of instruction in 1896-7 Consisted
of the following subjects

I Industries Compulsory

(a) Drawing Compulsory

- (1) Freehand pattern
- (2) Foliage from nature
- (3) Model

(4) Geometrical

- (a) Practical, plane and
solid Perspective

(b) Mechanical from Measurements

- (5) Design and simple
ornament

Modelling in Clay

II Industries optional

- (1) masonry comprising Surveying
+ Levelling, Earthwork & Roadmaking
Building Drawing & Estimating,
Building materials & Construction
+ measurement
- (2) Carpentry, Wood-carving and
Fretwork
- (3) Blacksmith's work
- (4) Fitters work
- (5) Rattan work
- (6) Pottery's work including tile-
making
- (7) Weaving
- (8) Engraving & Artware

Painting and Aluminium industry
were subsequently added to the curriculum
of the school but were given up after a
short trial. The masonry class was
abolished after the Engineering school
was started in June 1903.

In 1896 7 right classes were opened
for the general education of the pupils
of the school. The strength of these
classes on the 30th June 1903 was 53.

Besides manual work, the pupils
are taught the use of machines.

Connected with the industries taught such as the mortaring machine the Circular saw-bench, the scroll saw, drilling and screw cutting machines &c. In the Blacksmiths' class locks & keys were made and much miscellaneous work including repairs of the iron work of Carriages was turned out in 1893-4. In 1894-5 Carpentry, fretwork, Rattom work, and Blacksmiths' work had so far advanced that the school was able to execute orders from the Public of the Value of Rs 1202/- Almshouses, Pigeon-holes, steel-knives, office trays, fancy baskets, paper cutters, penracks were among the articles turned out.

The more advanced of the pupils that learnt weaving were able to manufacture sheeting cloths, Checks and other ordinary Cotton fabrics. These and other articles of domestic use turned out by the school were greatly appreciated by the Public.

and have always commanded a fairly good sale. Inland work was taught in the Artware manufactory under the supervision of the Superintendent of the Industrial school. The school has also been able to manufacture Mangalore roofing and flooring tiles of good quality for which there is a large demand from the Mysore Town Improvement Trust Board. Recently the school was able to supply highly artistic scrolls of modelled work in the ancient Chalukyan style for the front of His Highness the Maharajas pavilion which were greatly admired.

The school began to send up Candidates for the Madras Technical Examinations in 1894-5. Unfortunately the institution has not been able to get the full credit for its labours as most of the students

124

do not stay sufficiently long to go up
for examinations but leave the school
as soon as they learn enough to earn
a few annas a day. But those that
have continued their studies and
have gone up for examinations have
acquitted themselves creditably
at the different examinations, some
of them taking a high place in
the list, 14 in the first Class and
two first in the Presidency. Some
of those that have passed out of the
school have gone to Hyderabad
and other places to earn their livelihood
and a large number of them
have been recently employed as
Surveyors and draftsmen on the
Mysore Town Improvement Scheme.
A Muhammadan student of the
school has been learning in Bombay
Higher Painting and ^{the} Industrial Arts.

No difficulty has been felt as a

rule by the pupils of the masonry,¹⁴
Carpenter and Blacksmith's classes to
find employment, and many
pupils of the masonry class have obtained
appointments in the D P W as
draftsmen, surveyors &c. Many
others are earning a living as Contractors
Carpenters, Masters &c

The accompanying statement
shows the income and expenditure
of the school from the date of its
establishment to 1902-03

A large portion of the expenditure
incurred in each year consists of the
cost of the machinery and tools with
which the institution has been equipped
from year to year About Rs 3600/- a
year have been expended on accounts
of scholarships to the students in
the Industrial school, the Weaving
department attached to the school
and ^{the} artware manufactory. The
receipts during this period have

Varied from Rs 208/- to Rs 2,384/- They have no doubt been small, but, as it is not in the nature of such an institution to be self-supporting in its initial stages of development and as the object, with which it is maintained, is admittedly more educational than Commercial, it is not to be expected that the institution can be made to pay its own way or even, meet a considerable portion of its cost. In any case the pay of the Superintendent and of the office establishment, the pay of the Drawing master and the teacher of Engineering subjects in the so-called masonry class, the house rent, the large sums given for scholarships both in the Industrial school itself and in the Weaving and Artware departments outside the school, the cost of constructing buildings, sheds and furnaces and the cost of machinery, plant, and tools with which the school

18

has been liberally supplied from
year to year. Can hardly be expected
to give an ^{appreciable} ~~substantial~~ return in the
shape of larger sale proceeds of
the workshops

Perhaps better progress might
have been shown and more satis-
factory results obtained than
what have actually been attained,
had it not been for the unbusiness-
like habits and mismanagement
of the late Superintendent, and the
frequent interruptions, caused by
plague on account of which the
school has so often been closed or
deserted by boys for a good part of
the year

Extract from the Proceedings of the 82nd Meeting
of the Council of His Highness the Maharaja,
held at Bangalore on the 21st Sept^r 1904

III Subject (Clause ~~x~~ of ^{the} Schedule)

Proposal to revise the Scale of Establishment of the Mysore Industrial School at an additional monthly cost of Rs 170/-, the present cost being Rs 434

Opinions of the Dewan & Councillors

The appointment of a new Superintendent for the Industrial School on a pay of Rs 200/- rising to Rs 250/-, which is an item of the proposals, has since been sanctioned, and the monthly allowance of Rs 50 which was being paid to Mr D'Grey temporarily as the Secretary of the School, has ceased. The other proposals may lie over for the present, i.e. till the new Superintendent gains some experience & is in a position to form his own opinion and advise the Committee on the requirements of the Institution.

(Signed) P N Krishna Murthy
Dewan of Mysore

24 9 1904
Secretary

Printed and Published by

Submitted to His Highness

Of the proposals made by Mr Bhabha for revising the scale of the Industrial School Establishment at Mysore, the first proposal relating to the appointment of a Superintendent on Rs 200-25-250 has already been sanctioned. In his Memorandum, Mr Bhabha has stated that owing to the negligence of the late Superintendent, the results achieved by the school have not been as satisfactory as they ought to have been. The new Superintendent has recently taken charge of the school and the other proposals may for the present lie over till he gains some experience and is able to give his opinion on the requirements of the institution.

OFFICE OF INSPECTOR GENERAL OF EDUCATION IN MYSORE

Bangalore $\frac{27}{30}$ April 1904

H J BHABHA Esq Ma,
Inspector General of Education in Mysore

Mr Anantawann Rao Esq MA,
Offg Secretary to the Govt of Mysore,
General and Revenue Departments,
Bangalore

I have the honour to submit that the Budget Estimates of the Government Industrial School at Mysore were considered at a meeting of the members of the Committee held on the 21st March 1904 and a revised scale of establishment as shown in the accompanying statement has been adopted for submission to Government for approval and sanction.

2. The charges of the Establishment as provided in the Budget for the current year amount to Rs 424, a

month as shown in the Statement.

By Government Order No G ⁷1332-4 _{5d} Flag 26
dated the 31st August 1903 a Technical
Instructor on Rs 70, a Secretary on Rs 50
and a Master for the Pottery Class on
Rs 30 were appointed out of the pay of
Rs 150 which the late Superintendent
received. By Government Order No G ⁷583-4 _{2d} dated the 3rd August 1903 Flag 3
the pay of the Carpentry Maistry was
increased from Rs 30 to Rs 35 and the
appointment of a Smuttry Maistry
on Rs 35 in place of two maistries
on Rs 20 and 10 respectively was save-
tioned at an additional cost of Rs 10,
for which a reappropriation Statement
was called for. The scale as thus
modified and the charges amounting
to Rs 434 are also shown in the
Statement.

4 At a meeting of the Committee
held on the 10th November last it

was resolved that the pay of the Mechanic Master be raised from Rs 35 to Rs 45 with a prospect of its being further raised to Rs 50 and that the pay of the ^{Head} Pottery Master be raised from Rs 25 to 35 with a view to secure the services of a well qualified person for the work. It is proposed to make in the school stoneware pipes for drainage for the Mysore Improvement Scheme.

5 The revised scale adopted by the Committee at their meeting on the 21st of last month provides for a Superintendent on Rs 150. At the time when this resolution of the Committee was passed the Committee were in hopes of securing the services of Mr. G. Subbawami Aiyar B.A., L.T., Superintendent of the Madura Technical Institute as Superintendent of the Mysore Industrial

School on Rs 150 But on further
inquiry it has been ascertained that
his present pay at Madura is Rs 200
and he has prospects of getting more
I have therefore proposed in my
letter No 9608
388 dated the 27th April 1904 (Separate file;
to the General Secretary that Mr. G.
Subbuswami Aiyar may be appointed
Superintendent of the Mysore Indus-
trial School on Rs 200 rising by
annual increments of Rs 25 to Rs 250,
and that he may also be assigned
the additional duties of regularly
inspecting all other Industrial Schools
in the Province, of guiding the
industrial work of these Schools and
suggesting improvements, and of
seeing that the accounts are carefully
kept in the prescribed forms. The
scale revised by the Committee also
provides for a Maistry on Rs 35 for
a weaving department proposed to be

opened in connection with the school. It provides for the pay of the Mechanic Master at the increased rate of Rs 45 and of the Pottery Master a Rs 45 also, as a really skilled man cannot be induced to work in the school on smaller pay. At the meeting of the Committee held on the 10th November last it was resolved that the old Drawing Master be served with a notice that his services would not be required from 1st January 1904 and that a full time Drawing Master on Rs 40 might be engaged. The Drawing Master of the Engineering School whose pay in that school was Rs 40 was accordingly transferred to the Industrial School in January last in place of the former Drawing Master whose pay was Rs 30 a month. The revised scale provides for the pay of the

Drawing Master at Rs 40. The scale of establishment as suggested by the Committee and modified by me in respect of the Superintendent's pay and now submitted for sanction is shown in the third column of the statement. The monthly charges according to this scale amount to Rs 604 which is Rs 180 in excess of the provision in the Budget. I request that Government may be pleased to accord sanction to the revised scale and the extra cost which it involves.

6. I beg to propose that of the extra cost, Rs 120 a month or Rs 1440 a year may be met from the savings under the head I (3) Scholarships, as the scholarships given in the Weavers' Class and in the Artware Manufactory have been discontinued and the Rs 1440 provided for these scholarships is available in the

Budget - The extra cost remaining
to be sanctioned by government
is Rs 60 a month or Rs 720 a year

I have the honour to be,

Sir,

Your most obedient servant,

H. Shabka
Inspector General.
